## KX-T7630

### Digital Proprietary Telephone

This ergonomically designed KX-T7630 digital proprietary telephone offers a host of state-of-the-art functions to meet the needs of the demanding customer. A full set of control keys allow access to frequently-used functions such as transferring and conferencing calls. The new Navigator Pad provides speed and efficiency when programming names and telephone numbers, searching of quick-dial numbers and use of the many other system features.

#### **Multi-Angle Tilt Body**

The body can be set to any of four angles to save space and allow for the most comfortable positioning. By changing the body tilt, you can also change the angle of the LCD display to obtain the optimum viewing angle for easy operation.

#### **3-Line, 24-Character Display**

The LCD displays the various system information such as Caller ID, Date and Time, Call Log, Speed Dialing and Feature menus. An LCD contrast adjustment permits adaptation to different lighting conditions. The Multi-Language LCD Support allows the extension users to select from up to the five languages.

#### **24 Flexible Outside Line (CO) Keys**

Each extension user can program these keys for various functions such as CO Line appearance, Direct Station Selection (DSS) Key, One-touch Dial or feature setting, all of which help you achieve smoother call handling. Each key has a dual colour LED (red/green) that shows information such as line status, extension status or whether a feature is on or off.

#### **EXtra Device Port (XDP) / Digital XDP (v1.1)**

The XDP jack on the back of the phone can have the same extension number as the phone itself, for convenient use of an answering machine or a cordless phone. It could also be a different extension number so you can use a modem or fax on one phone line while speaking on another line. Using D-XDP (v1.1), you can connect a digital proprietary telephone for another extension user. With this feature it is possible to increase the number of digital sets without additional station cards.

#### **30 Ring Patterns**

Each extension use can select particular ring patterns for each type of call received. For INTERCOM, CO or group calls, the user can choose from 10 melodies or 20 ring tone. In this way, the nature of the incoming call can be distinguished simply by the audible ring pattern heard.

#### **2.5 mm Headset Jack**

Connect a low cost 2.5 mm headset to your digital telephone for hands-free operations with no need for an amplifier. This connector size has been adopted by the cellular industry making the personal selection of a headset easy and affordable.
