Panasonic

KX-NT560B

IP Proprietary Telephone

The sleek, ultra-modern designed KX-NT560 IP Proprietary Telephone takes you to a new dimension in audio experience through excellent HD quality audio on every phone, combined with easy access to powerful supportive features and applications. A full set of control keys allow access to frequently-used operations such as transferring and conference calling. The Navigator Key provides speed and efficiency when programming names and telephone numbers, searching of quick-dial numbers and accessing many of the system features.

[10-Line Equivalent, 4.4 Inch Graphical Display with Backlight](#)

The LCD displays the various system information such as Caller ID, Date and Time, Call Log, Speed Dialling and Feature menus. The contrast level and back light settings are adjustable to adapt to different lighting conditions. The Multi-Language LCD Support allows the extension users to select from up to the five languages.

[24 Self-Labeling Flexible Outside Line \(CO\) Keys](#)

Using 3 pages of 8 keys, each extension user can program these 24 keys for various functions such as CO Line appearance, Direct Station Selection (DSS) Key, One-touch Dial or feature setting, all of which help you achieve smoother call handling. Each key has a dual colour LED (red/green) that shows information such as line status, extension status or whether a feature is on or off.

[Speakerphone with HD Audio](#)

The KX-NT560 is equipped with a full-duplex speakerphone which delivers HD (High Definition) audio quality on every phone due to the enhanced echo cancellation and an expanded acoustic chamber. The full-duplex speakerphone sends and receives audio simultaneously, allowing the user to hear the person at the other end even while speaking themselves.

[Headset Jacks](#)

The KX-NT560 provides a 2.5 mm headset jack as well as a 3.5 mm Electronic Hook Switch (EHS) controlled jack for maximum headset flexibility.

[Built-in Bluetooth® Module](#)

This unit features a built-in Bluetooth® module that can be used to wirelessly connect a Bluetooth headset to the phone. This function works with cellular-style Bluetooth® headsets of various types.

[Dual Gbit Ethernet Ports](#)

Dual Gigabit Ethernet ports on the back of the KX-NT560 allows connectivity of the IP Telephone and a computer at a work station that has only a single CAT5 jack (10/100/1000 Base-T). A built-in Layer 2 switch delivers prioritization of voice over regular data utilizing Quality-of-Service (QoS) through VLAN and Diffserv support.
